

Foundations Math 11  
Research Project  
Step 2 – Create your research question or statement

The second step in this process is to create a clear research question or statement. Please read pages 156-157 in your textbook and carefully consider exactly what you want to investigate.

Follow the directions under “Your Turn” on page 157 and carefully evaluate your research question or statement using the checklist on the bottom of page 156.

When you are satisfied with your research question or statement, submit it to Mrs. Buck by email at [tbuck@sd73.bc.ca](mailto:tbuck@sd73.bc.ca).

The question or statement will be assessed out of 12 marks - 3 marks for each of the 4 checklist items on page 156:

- 3 – Research question meets the checklist item very well
- 2 – Research question meets the checklist item satisfactorily,  
some details are missing
- 1 – Research question meets the checklist item poorly,  
many details are missing
